

How to enroll users and get the offer for Cvoid-19

There are 2 methods that schools can join this plan and enroll students quickly and easily.

Method 1: Enroll the users with a template

1. Download the template at <https://cdn.funchinaworld.com/template.xlsx>
2. Fill out the list and email the list to us at service@funchinaworld.com
3. We will help to enroll users and add each user's subscription plan.
4. If the user list needs to be updated, please email us a new one.

Tips: To schools that can provide a list of users, please follow Method 1. With Method 1, students and teachers will get free access in 24 hours after we receive the list.

Method 2: Create a class and invite students

1. Teacher signs up a teacher's account at <https://funchinaworld.com>
2. Verify the teacher status at <https://portal.funchinaworld.com/teacherStatus>
3. Create a class and invite students to join it after the teacher's verification is passed. If needed, download the guide on how to create a class and invite students at <https://cdn.funchinaworld.com/How+to+create+a+class+and+invite+students.pdf>
4. After all the students register their accounts and join the class, please contact us at service@funchinaworld.com with the information below:

School name:

Class code:

Teacher's registered email address:

5. We will help to add each user's subscription plan in the class.

6. If the students in the class need to be updated, please send a new email to us with the information in step 4.

Tips: To schools that can't provide a user list or using Google Account/Clever Login, please follow Method 2. With Method 2, all the students need to complete the registration and join the class before they get free access.

Email address is the account to register to the platform for further service, such as, to reset password, to request tech support, etc. If the student's email address cannot receive emails, we recommend registering with parents' email address.

If neither of the methods meet your need, please contact us at service@funchinaworld.com
